Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Claims 1, 9, and 16 are generic to the following disclosed patentably distinct species:

Species I – Figures 1-7

Species II – Figures 8-9

The species are independent or distinct because species I requires two flash pans, one on each side of the bottom of the window and species II requires only one flash pan across the whole length of the bottom of the window. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.
MPEP § 809.02(a).

During a telephone conversation with Mr. Schwartz on 03/06/06 a provisional election was made without traverse to prosecute the invention of Species I, claims 1-20. Affirmation of this election must be made by applicant in replying to this Office action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jessica Laux whose telephone number is 571-272-8228. The examiner can normally be reached on Monday thru Friday, 8:30am to 4:00pm (est).

Claim Objections

Claim 4 is objected to because of the following informalities: line 1 recites the limitation "first" flash pan. There is insufficient antecedent basis for this in the claim. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 6, 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Burroughs et al. (5822933).

In regards to claim 1: Burroughs et al. teaches a method for managing water infiltrating a building at a window opening, the method comprising the steps of: (a) from an inside of the building, where the installer would stand inside the building and reach through the open window, to access a gap formed at a base of the window opening between a window sill and a horizontal window framing member (Col. 5, lines 36-38); and (b) installing a flash pan (10) within the gap to collect water entering the gap (Col 5, lines 36-38).

In regards to claim 6: Burroughs et al. teaches the method according to claim 1 above, and further teaches promoting the flow of water collecting in the flash pan towards an outlet (34) formed in the flash pan (Col. 5, lines 39-42).

In regards to claim 7: Burroughs teaches the method according to claim 6 above, and further teaches transporting the water from the outlet in the flash pan through a drain tube (32) extending away from the gap.

Allowable Subject Matter

Claims 2-5, 8-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jessica Laux whose telephone number is 571-272-

8228. The examiner can normally be reached on Monday thru Friday, 8:30am to 4:00pm (est).
